VOLUME V, NO. 2 THE GOLD CENTER NEVADA CITY, NEVADA COUNTY, CALIFORNIA, THE COUNTY SEAT PAPER DECEMBER 5, 1930

NEVADA FIRM ACQUIRE HOLDINGS NEAR DOWNIEVILLE

Nevada County People Acquire Valuable Mining Interests in Nevada and Incorporate New Mining Company Property at Goldfields, Nevada.

RENO, (Nev.) Dec. 5.—The Wide-awake Mining Company has been incorporated under the laws of this state by Nevada County, California interests for the purpose of acquiring and developing extensive lode and placer holdings located near Downeyville, California. The property is described as containing valuable gold-bearing gravel and quartz veins and also embraces water rights. Mining, it is stated has already commenced it is stated.

Control of the Old Silver Pick Consolidated Company, one of the fist corporations ever operating in the Goldfields district, has passed to a Nevada Counyt, California corporation headed by Roy J. King, according to a statement given out at Tonapah by former officials of the company. The company is said to have closed a deal for a promising gold group located in Nevada County, California, near Grass Valley. and also to be negotiating for several well-known Nevada properties.

Exploration of an extensive deposit of crome seven miles from Folsom, California is progressing favorably, according to E. W. Bedford who is in charge of activities. The property recently passed under control of Nevada interests and is being prospected with drills. A concentrating plant is to be installed if the deposit proves to be as extensive and commercially valuable as prospecting now indicates.

The Dix Butte Company, working gravel properties near Magalia, California, report that ample water should soon be available for steady sluicing. The channel has been developed by a 3,500 foot tunnel and 175-foot raise and a large amount of gold-bearing gravel is said to be exposed.

EARLY SUNDAY MORNING FIRE RAZES HOME

Fire, at an early hour on last Sunday morning partially destroyed the residence of Alfred Heether, located on Zion street.

The fire had gained such headway when it was discoved and an alarm turned in that it was impossible to save the building.

Origin of the fire has been undetermined but from the fact that the blaze was first discovered in a closet in which all the electric wiring was centered leads to the belief that defecting wiring was the cause.

The house was occupied by W. L. Lobdell and "Dad' Erickson and they were asleep when the fire started and were only awakened by the roar of the flames. Erickson, hearing the roar of the flames, for an instant thought it only the wind blowing and paid no particular attention to it but turning his head he saw the brilliant light of the fire and gave the alarm to his companion.. He stepped over to a clothes closet from which the roar seemed to eminate and jerked open the door to be met with a rush of flame and smoke. As he was grouping for his clothing the front door was broken open by Carl Foote and a friend who had been driving by.. They phoned in an alarm to station No. 2 and about the same time R. D. Steger noticed the flames and also phoned in an alarm.

The fire company made a quick run and faught valiantly to save the building but their efforts were useless, as the fire had had too much of a start before they arrived on the scene Lobdell, suddenly aroused from his slumbers made a rush for a nearby garage to give warning and save the cars stored therein and left all his personal belongings in his room where they were destroyed.

Neighbors, succeeded in saving some of the furniture of the home but the flames destroyed most of the furnishings.

A small insurance policy was carried on the building and contents but the loss was considerable above the value of the policy.

HENLEY MINE WILL SOON BE DEVELOPED

It is stated that the McIntire interests in the Henley Mine at Morris Ravine, eight miles north of Oroville has been bonded by J. M. McClung of Oroville. McClung states that he intnds to develop the property on a much larger scale and extract the gravel by modern methods. The property was unsuccessfully worked by small crews for many years under the management of the late Henley.

The Henley Mine proper comprises a plot of land known as Lower Table mountain. This is a level capped mountain claimed by geologists to be a part of Table Mountain proper.

Under this lava capping large volumes of commercial gravel was extracted by the Yuba, Goodall & Perkins, Old Glory and Hendricks mines.

EIGHT FOOT VEIN STRIKE REPORTED IN ELKO MINE

ELKO, Nev. Dec. 5.— The Tuscora Imperial Company reports discovery of an eight foot vein of ore on its holdings in the old Tuscarora district. The strike was made in virgin ground at a depth of 172 feet and about 1,000 feet from the old workings. The ore is said to compare favorably with the rich product mined in early days and show ruby and native silver and commerciall values in gold. The discovery is said to have caused considerable excitement in the camp, and is expected to stimulate activities of other operators in the district.

Rich gold ore has been uncovered in the Big Six mine of the Mexico the Lynn Creek section fifteen miles south of Carlin, according to reports reaching here. The Big Si xwas recently taken over by the corporation which also own properties near Beo-Wawe, Imlay and other points.

The Elko Prince mine near Midas has been leased by the Gold Circle Consolidated Mines Company to a group of local miners. Preliminary work has begun on a promising ore body. The company is deepening the workings on its main holdings, preparitory to more extensive mining of veins in the Rex, Elko Prince, Grant, Missing Link and other properties comprising the group.

MILE HIGH GLIDER CLUB ORGANIZED AT TRUCKEE

Winter sports enthusiasts seeking new thrills among the deep snows of California's mile-high mountains will find them this year in the Lake Tahoe region, it was revealed today.

Organization of the Sierra Gliding Club, with headquarters at Truckee, has just been completed for the purpose of providing an added attraction in the realm of snow land's big outdoor show.

Sponsored by a group of Truckee citizens, the club will be the first, as far as we know, to use snow clad mountain slopes to send a glider into the air, according to Wilbur L. Maynard, vice-president of the club and manager of the Southern Pacific's winter sports bureau.

A glider has been purchased for the club, Maynard announces, and membership in the organization has been opened to all persons visiting Truckee-Tahoe country for the annual snow sports.

Under the direction of a qualified instructor, members of the Sierra Gliding Club will attempt to make flights from the slopes of the famous Bald Mountain, so named because it is treeless. Snow covered Martis Valley, where neither tree nor shrub nor fence can be seen for 20 square miles, will be the soaring ground and landing field of the amateur fliers, it is stated.

The club plans to invite Col. Chas. A. Lindbergh to inspect its project with a view to advising members how best to use their ski-equipped glider, according to Maynard.

SONOMA MINE BUILDING TRAM

One Hundred Ton Rotary Furnace Will Be Added By Next Spring

The building of the new aerial tramway and other improvements at the Beaumeister and Cloverdale qhicksilver mines near Cloverdale, California, will be completed in about three weeks by the Nevada Quicksilver Company, states L. A. Friedman, general manager of the company. The addition of a one-hundred ton rotary furnace to the present equipment is also scheduled for early next spring. He states that the development of new ore bodies in both mines is proceeding satisfactorily.

The Interstate Mining and Investment Company, in which Stockton, California people are heavily interested has resumed work, sinking the shaft on the gold-silver property in the Como field over near Virginia City. The shaft is now down 125 and this will be driven down to water level which is believed to be about 200 feet below the surface. From this point drifts will be sent out so as to prospect the ground thought to contain extensions of profitable ledges. An electric power line has been extended to the camp.

Shipments of gold ore has begun from the Comstock Home Mine at Silver City, Nevada, with a new shoot of rich ore said to have been recently uncovered. This mine has produced a large tonnage of rich ore and is located on the southern end of the Brunswick lode. The Belmont Uncle Sam Mine is working oldKeyes mine with a good body of rich ore exposed. The old Emma Nevada group was taken over under lease last week by Reno and California people. They expect to start ore shipments to a local mill shortly

WILL INSTALL NEW PLANT AT BUTTE MINE

Henry H. Geroux of Berry Creek, reports that A. Mitchell and G. W. Hammet of San Francisco are constructing a shaft with an incline of forty-five degrees on a vein of ore which shows a thickness of twelve inches in width. The property is known as the Sierra Queen Quartz Mine and consists of forty-five acres embracing five veins of gold ore. The property is equipped with a modern hoist and a three-stamp mill, used to prospect the ore recoveries. The machinery is operated by gas engine. Power from the Great Western Power Company plant only five miles away is available.

With the development work completed and the values contemplated the owners have announced that they will install a plant sufficient for all future needs. Five men are employed on development work.

PIETRO ORZALLI PASSES AWAY THURSDAY MORNING

Peter Orzalli, a well known pioneer of this section, passed away at an early hour Thursday morning at his home on Broad street, after being confined to his bed for the past ten days with diabetis. Everything possible was done for him and the tender care by his wife and daughter was supplimented by trained nurses, but with no avail, and he passed into eternal rest at two-thirty yesterday morning.

Pietro Orzalli was born in Italy, June 29, 1854. He came to this country as a lad of 13 and spent several years in Philadelphia. When 19 years of age he came to this section where he has made his home ever since.

In 1879 he was united in marriage to mary Coan and for 35 years they lived in their ranch home at Cement Hill, but for the past few years they have lived on Broad street in this city.

Besides the beloved widow, a son, Leslie Orzalli and a daughter, Mrs. Irene Lopez survive him. Five grandchildren, Mrs. Wm. Ghedotti, Leslie Orzalli, Jr. Lester, Mary,-Elizabeth and Carlton Orzalli.

The funeral services will be held Saturday morning at 9:30 from St. Canice church. Interment will be in the Catholic cemetery.

SKI CLUB HOLDS ROUSING MEET

Committees Appointed and Reports Made—Work On Course Sunday

The meeting Tuesday night of the Nevada City and Grass Valley Ski Club was well attended and considerable enthusiasm was manifest regarding the activities of the Club during the coming winter months.

The meeting was held at the Nevada City Commercial Club rooms and was called to order by H. W. Robinson. who made a brief talk as to the purpose of the meeting.

Wendell Robie, president of the California Ski Association was present and gave an interesting talk on various phases of ski tournaments dwelling in particular of the various duties of the association officials of tournaments. During the course of his talk he took occasion to recommend various activities of ski tournaments and strongly recommended cross country ski races between the local members of the clubs.

Following Mr. Robie's talk the secretary made his report on membership, showing 208 members now signed up. Report from Francis Hogan, chariman of the membership committee was read and at the conclusion of the reading a vote of thanks was tendered Mr. Hogan and his co-workers for their yoeman service in securing members.

The committee on buildings reported as making arrangements with local carpenters to make repairs on the barn that will be used for housing purposes at the course.

Chairman Robinson appointed an executive committee, composed of R. J. Bennetts, chairman; Fred Cassidy and Robert Carr with authority to go ahead and act on all matters pertaining to the affairs of the course.

The chairman also named a committee on entertainment and concessions, with full power to act. The committee named consists of R. Goine, W. M. Gracey and the chairman himself.

Alfred Kramn was named as a committee of one to investigate different designs for medals and to select a club emblim. He is to work in connection with Ed. Hunt, Bob Carr, H. J. Shirley and Francis Calhoun, who are on a committee for the selection of sweaters and colors.

Mr. C. W. M. Gracey was named secretary of the Nevada City branch of the association. It was brought out at the meeting that about $675 was paid in and $1675 has been pledged altogether.

Strong emphasis was laid on the fact that there will be work to do at the course next Sunday. Both members and non-members are urged to come out to the course next Sunday and see the progress that is being made.

SIERRA MINE TO BE WORKED UNDER SNOW

DOWNIEVILLE—Mining under novel conditions will be carried on at the Four Hills Mine on Lower Spencer Lake this coming winter.

The surface works of the mine are in a place where the snow falls and drifts to a depth of forty feet during an ordinary winter.

The boarding house was built three stories high. Then a flag pole was put on top in order that it might be located when everything else was buried under the snow. An entrance to the building was made through the roof. The occupants live in semi-darkness much of the time. A series of tunnels in the snow connect the various buildings.

Andrew Bachels of Goodyear Bar has a lease and he plans to keep ten stamps going through the winter.

JOHN MACKEY RETURNS FROM AFRICAN MINES

John Mackey of French Gulch who has held mining superintendencies in several districts in this county and who has been working as superintendent for a large copper company in South Africa for the past year is back in the States. He states that he is back in California to stay. It took him five weeks to make the journey from the mine in South Africa to San Francisco.

TRINITY HYDRAULIC MINE WILL MOVE IMMENSE VOLUME

Said to be the Largest Placer Workings in the United States and Attracting Great Interest From Eastern Mining Men.

Indicative of the magnitude of operations in some hydraulic mines from the standpoint of volume of solid matter removed, is the statement issued this week by the Sayler Consolidated Mining Company revealing plans for mining in Trinity and Humbodt counties, fifty-five miles east of Eureka, on the Trinity-Highway.

The statement in part says:

"One seven-inch giant has been turned into the company's No. 3 pit as the initial operation and the company is prepared, as the season advances, to turn the water into additional giants until four pits will be running simultaniously under the drive of six or more giants varying in size from five and one-half inch nozzles to ten inch nozzles, with water-head of from 200 to 600 feet.

When in full operation the company expect to be moving a minimum of 30,000 cubic yards of gravel daily. The company's investment exceeds half a million dollars.

The properties comprise approximately two thousand acres and the engineers have stated that there is a minimum of 125,000,000 cubic yards of gravel in sight with an average valuation in excess of forty cents per cubic yard. The cost of operation including amortization of the investment in five years, according to the engineers, will be approximately five cents per yard.

The average water pressure at the pits will be close to 200 pounds to the square inch.

The report for the original owners on the property and water resources were made by H. L. McCready, C. E., of Sacramento and he has continued as resident engineer in charge of construction work. There is no debris problem confronting the company as the matter is discharged into the Klamath-Trinity watershed which drains directly into the Pacific Ocean without menacing operation of shipping.

FIRE PARTLY DESTROYS HORNET MINE PLANT

Fire starting at 6 o'clock Friday evening in the rock crushing plant at the Hornet mine of the Mountain Copper Company destroyed the main part of the plant before the flames were brought under control, about 9 o'clock that night.

Superintendent Morton J. Murphy was not able to estimate the loss as yet with any approach of accuracy.

The crushing plant was a large frame structure built up on the side of the mountain, with the crushing plant proper at the top, the roller plant in the center and the screening plant at the bottom. It was just the crushing plant proper that was consumed. Most of the rollers and the screens were saved. Some bunkers were saved.

It is a matter of great importance that the head house of the tramline was saved. The sixty men in the service of the company made a gallant fight to save the property.

At one stage of the fire, Morton J. Murphy, superintendent, telephoned to Redding to Supervisor A. H. Gronwoldt asking for the assistance of the Redding fire department. The fire department was all lined up to go, when word came from the mine that their services would not be required.

Gronwoldt was at the fire an hour and a half after the fire started.

That was mightly fine in Gronwoldt," said Superintendent Murphy.

The fire was really a difficult one to fight on account of the sulphur smoke coming from the burning of sulphide ores in the bunkers.

While all danger was over at 9 o'clock, fire burned all night. Men were on guard all the time. The sulphide ore was still burning the next day and resembled an old fashioned roaster like they used to have in the olden days.

Sixty men are employed in and around the Hornet. Superintendent Murphy was not prepared to say Saturday morning as to how long and how much work in the mine would be curtailed until the plant is restored. He did not know how the fire started. The loss is partly covered by insurance as the Mountain Copper Company keeps everything insured at all times.

MRS. CHARANNAUT, FORMER RESIDENT HERE, PASSES

Mrs. Elizabeth Charonnaut, widow of the late A. A. Charonnaut, passed away at the home of a daughter in Los Angeles, Tuesday, according to a message received yesterday by Dr. C. W. Chapman. Mrs. Charonnaut has been ill for several months, a paralytic stroke being the immediate cause of death.

She resided at the old Charonnaut home east of this city for many years and was well known and highly esteemed by all yho knew her.

Ignition Parts and Accesories at Miner's Foundry. 24tf

SAN FRANCISCO GROUP TAKES OVER FORD MINE

Further revival of mining in the Mother Lode section was evidenced recently when the announcement was made that I. E. Selix, San Francisco merchant and a group of associates had commenced the rehabilitation of the old Ford mine near San Andreas.

Selix, although in the mercantile business for many years past, was born in the famous lode camp of Leadville, Colorado, so it is said, and is the son of a mine operator of the Rocky Mountain region. As superintendent of the Ford property the company has named Joseph E. King, a practical miner of thirty-seven years Mother Lode mining experience.

According to Seix, the mine embraces ore bodies estimated by engineers to contain over a million tons of commercial ore. The present depth is 750 feet with 3,500 feet of lateral work and no stoping. It is generally conceded among lode mining men that upwards of $250,000 has been spent in development work on the mine during past years.

Selix states that his company intends to erect a ten-stamp mill with a daily capacity of one hundred tons and will use the cynaide treatment. They will employ a modern process whose tests have shown results of a bullion recovery of 95 per cent.

The Ford was opened in the early 90's by the Ford Brothers, who are said to have taken out approximately $300,000, largely in high grade values. A major portion of this return was used in exposing the lower grade or milling ore bodies. Lacking finances with which to install a mill adequate to treat their ore at a profit under the old methods, the owners were finally forced to cease operations.

Soon after closing down the mine was purchased by Alton Hawes of the San Francisco mint and it is with him that Selix and his associates have consummated a deal whereby they come into possession of the property.

The mine will be operated by a Nevada corporation known as the Calaveras Development Company

The personnel of the company are as follows: W. L. Merril, E. M. president; P. J. de Flores, vice-president; Sol Silverman, secretary; and I E. Selix, treasurer.

Three shifts of miners are to be employed and they expect to have the property in working condition within the next month and a half at the farthest..

"We are confident the Ford property will prove a big mine" stated one of the new owners There is no suestion but that the mine is well worth opening. The earlier operators sought the high grade ore only but we will direct our attention to the lower grades of ore of which there is sufficient tonnage in sight to maintain operations for years to come."

BUSINESS DEPRESSION TRACED DIRECTLY TO SHORTAGE OF GOLD SUPPLY IN WORLD

The present widespread business depression like Banquo's ghost, will not down in spite of all the optimistic whistling through the graveyard of industrial decadence, both national and international. President Hoover has done yoeman service in his efforts to stay the tide of receding confidence and the spread of unemployment and has had mediocre support from the captains of industry called together at Washington D. C., shortly after the disastrous security panic of a year ago to discuss business prospects. This lack of support on the part of our captains of industry is not wholly without justification in spite of the serious consequences that continue to accrue. This is reflected in a statement made by Owen D. Young, who is quoted in a recent issue of the Literary Digest as saying:

"Well, what shall we do with our surplus of wheat or cotton or what you will? We must get rid of it. There are only two ways. Either we must burn it at home or sell it abroad. If America starts to burn surplus wheat when people are hungry elsewhere in the world, that fire will start a conflagration which we cannot stop. If America burns surplus cotton when men are going unclothed elsewhere in the world, that fire will start a conflagration which will consume civilization. There is no way out except to market this surplus where men are hungry or unclothed.

The press of the country are to be commended on their insistent optimistic tone for the future, but the patient continues to suffer and the revival of an ancient remedy for the world's business ailments may be worthy of serious consideration.

It appears that one of the principal causes of the present world-wide industrial depression is the super-concentration of credits in the United States, that has been brought about, not by the World War, which was only an accentuating incident but by our standards of living—human comforts and heavenly attributes—fabricated from the plethora of natural resources with which this country is blessed and by the ingenuity of our people.

The envy in which the people of this country are held by other nationals, especially those of Western Europe, is not caused by the casual swank of the American abroad, but lies far deeper. It has its basis in our advanced pace in the creation of human comforts and luxuries with which they are unable to keep step, and in the fact that they are our financial debtors to such a large degree as to limit the probability of ultimate liquidation on a gold basis, which the leading financial minds of the world would decree to be the final medium of settlement.

In the matter of industrial progress this country has a long way to go to reach maturity, with vast untouched resources to that end, especially along agriculturial lines.

Among manufacturing lines, we have outdistanced all competitors and by continued research endeavor should hold this pace indefinitely. However, in our future expansion in industrial activities, while the wisdom of the altrusic pace he sets may be debatable, recognition must be given to Henry Ford's principle of minimizing unit profits and of more broadly diffusing his industrial activities over this country and over the world at large, in which he is so substantially supported by the General Motors Company and other high financial institutions of America.

It is probable that our present world-wide business depression with falling commodity prices, is caused by a condition of frozen credits as the result of the extremely limited supply of gold as a basis for ultimate settlement of extravagant issues of printed promises to pay, whose validity is evidently arousing serious international suspicion. The post-war German mark and the awful slump of paper currency running into the tens of billions of dollars that resulted in our own stock security panic in the fall of 1929 affords conspicuous examples of paper values not backed by gold or its equivalent and the only justification for the further expansion of the present paper credit medium of exchange is in our opinion, the international recognition of silver as an additional money of final redemption on a rational parity with gold.

To start silver values on the gradual upgrade by international agreement with the ultimate objective of $1.00 value for a standard fine ounce, and its international use of standard purity for subsidary coinage, would go far to better diffuse the money wealth of the world, put a jingle in the pockets of the lowly unatainable by paper money of doubtful validity and mitigate the fear of a surplus supply of the white metal.

The gold standard of ultimate redemption, fixed by a few leading western nations in an effort to control world credits, has had its day and was all right at the time, but which has seen its day and with the vast expanse of commerce is no longer sufficient to meet the demands made upon it and its quantity is now proving inadequate. When the present gold value was established, no allowance was made for the vast expansion of world-wide traffic that has taken place. Gold for this purpose is largely concentrated in the hands of half a dozen governments with the United States holding the main portion of the visible supply and France coming next with almost half as much more.

Mexico is the largest producer of silver with an annual output of one hundred million ounces, the United States second with sixty million ounces, Canada with twenty million ounces and South America with about thirty million ounces. This great silver producing belt has probably reached its peak of production. This is particularly true of the United States where we have very few straight silver mines, the bulk of the production coming as a by-product from the treatment of base metal ore deposits. It is a well established observation by scientific authorities that in the zonal order of ore deposits in veins, silver is a high riding metal and with rare exceptions of comparative shallow range in depth. Most of our base metal mines in which silver is an important by-product are now reaching great depth where earth temperatures are cutting a big figure in their economic operation and productive capacity.. Mexico can continue for many years as the leading producer of silver of the world, but the balance of the world's sources of supply, with the possible exception of Canada is destined to wane very rapidly, according to well informed authorities.

Wealth is converted labor, mental and physical, in the production of commodities from raw materials and silver seems to be the likliest lubricant for facilitating the expansion of business activities.

The silver producers of this country have remained almost mute in the present crisis as far as giving publicity to their ideas for fear that their attitude would be construed as selfish. However their leaders have done some deep thinking on the subject and can be depended upon to act as a fact-furnishing commission on the primary resources of gold and silver and to dispel any fear of a runaway production in either metal.

The present ratio of silver to gold now computable in human hands as pointed out by Rockell, is the old Roman ratio of two thousand years ago of about 13 ounces of silver to one ounce of gold.

The present low purchasing power of silver is not alone the silver producer's funeral. His interest is trifling compared to the universal interest in the situation. Labor, in particular, is now feeling the effects of the credit situation, especially among the silver-using people, constituting more than half of the world's population, and where millions of men who are willing to work are scarcely able to earn enough with which to purchase the bare necessities of life.

If America and international financiers can frame any reliable substitute for silver as money out of wood pulp, printer's ink and fluctuating governmental authority, it is time to get into the breach of present international business decadence before communism gets a strangle hold in the Orient and spreads around the world, which it seems likely to do unless some drastic steps are taken by the western nations to check its vicious progress.

The present crisis justifies liberal contributions of the brand of philanthropy in the form of gray matter to public affairs. In any game,, whether of cards or business, a consistent winner is always an object of suspicion by the other players. In the last analysis we are only a few generations removed from our European ancesters and in rotation of crude, raw material into products of human necessity, comfort and luxury that the human instinct so desires we occupy the position of a prodigal son who is able to furnish his own fatted calf for a feast of industrial attainment.

It's economical TOO!

PACK TRAIN TO CARRY OUT 5000 FOOT CABLE

KENNETT, Nov. 30.—The United Commercial Company took the contract almost five years ago to wreck the Mammoth smelter and mine buildings and machinery. Its time will be up on February 5 of next year, when, according to its contract it must vacate the premises. Whatever is left on the premises at that time will belong to the Mammoth Copper Company.

Notwithstanding the mining company sold all its personal property to the salvaging company, it never disposed of a single square inch of ground.

The Mammoth owned the Keystone mine from which it once shipped a great deal of ore. This ore was shipped over an aerial tram some five thousand feet long to the bunkers at the Balaklala mine where it was transferred to the Balakalala tramline and carried to Corma for shipment by rail to the smelter at Kennett.

One of the last jobs for the United Commercial company to tackle is to take down that tram line. Once upon a time there was a fair wagon road from the Keystone mine, but in the last five years landslides and rain have made the road impassable. So the company is assembling an old fashioned pack train which will carry the long cable and the buckets attached to it from the Keystone mine to Kennett.

EXAMINE YOUR $20 BILLS

Nevada City merchants are warned to beware of bogus $20 bills said to be in circulation throughout the Bay region and northern part of the state. The first reports of the appearance of these bogus bills came from Lake county where many were passed. Since then they have made their appearance in all sections of the state.

A Beautiful Christmas

BY

Florence Harris Wells

IT WAS Christmas morning. Two elderly persons stood at the front window of their big farm house and gazed at the snow blanketed world about them.

"Not a chance for Sam and his family to get through these drifts, Mother, not a ghost of a chance. No car on earth could make it."

"I guess you're right, Pa," Mrs. Clark answered, solemnly shaking her head with its beautiful wavy white hair. "And our dinner's well on the way. I'll have to tell Annie not to cook so many potatoes and perhaps we can manage to keep most of the turkey a day or so until the children can come. I suppose there's no chance for the snow plows to get through today either, William?"

"No. They'll clear the main highways first. But it's beautiful, isn't it, mother? with the ice and sleet on the trees and now the snow for trimming. It's as beautiful a Christmas morning as I have ever seen. And we're both well and strong and able to enjoy it together. It's great, isn't it?" Grandfather Clark slipped his arm about his wife's waist and drew her close beside him.

Meanwhile Sam and his family, seated about their breakfast table, were much more concerned about missing Christmas at Grandmother's and the good dinner than they were at the beauty of the world about them.

"Oh, grandfather and grandmother will understand," Marion, the daughter, was speaking. "We're the goats in this case. Ham and eggs for Christmas!"

"Gee! Can't we do anything 'cept sit here and talk about it?" Sam, Jr., aged fourteen, puckered his brows in evident great concentration. Suddenly he threw down his napkin and dashed for his sweater and cap.

"Where're you going?" Marion shouted.

The banging of the front door was the only reply.

In less than a half hour Sam, Jr., came bursting back again, all excited:

"Get ready! We're going! We're going!"

"Going—fiddle sticks!" Marion scoffed.

"Please explain, young man," Sam, Sr., quizzically demanded, a gleam of understanding coming into his eyes as he caught sight of tall, handsome Dick Roberts who had entered quietly after Sam, Jr., and stood just outside the door. Now he stepped forward.

"Merry Christmas, everybody!"

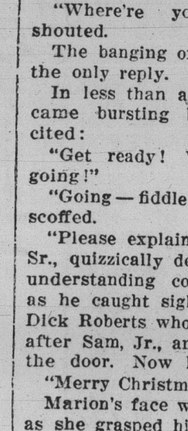
Marion's face was as rosy as Dick's as she grasped his extended hand. "I thought you were going to your sister's in the East," she stammered.

"I was," Dick laughed, "but business wouldn't let me. I don't mind now that I can be of service to you. Young Sam knew I hadn't gone, and he swooped down upon me and explained your predicament. And my plane is at your service."

"Your plane!" Marion gasped. "A plane in this snow?"

"Yes. My plane has skis, you know. I can take you one at a time and land you safely at your grandfather's."

Grandfather and Grandmother Clark were more excited than the others, if that could be possible, when Mrs. Sam arrived first and explained what was happening. Sam, Jr., came next; then Father Sam, and last of all Marion, all rosy and excited.



"Beautiful sight, wasn't it, gliding over the country?" Sam asked as he helped Dick off with his togs.

"Marvelous!" Then Dick added quickly, "But everything's wonderful to me today because it took a ride way up in the clouds to convince Marion that I could be her pilot for life. Congratulate me."

"You're a welcome new member of the family," Sam answered quietly and dropped his hand on Marion's shining hair.

"Mother and I thought this was the most beautiful Christmas we'd ever seen when we looked out of the window this morning," grandfather's eyes danced, "and we hadn't been riding in any airplane. When one feels right with the world it's easier to see the beauty of things we sometimes miss."

Sam, Jr., grinned at them all: "Some Christmas!"

(©, 1930, Western Newspaper Union.)

Pygmy Tribes of High Order of Intelligence

The pygmies of Africa are friendly, clean, intelligent and, in medical matters, wise beyond the wisdom of white men.

I saw one pigmy tribe perform a trepanning operation that was one of the most remarkable things I have seen on my travels. The operation was performed on a child. They used no anesthetic, of course. For a surgical instrument they used a sharp arrow head, with which they punctured the child's skull, using a stone to drive in the arrow head. The child screamed lustily, of course, but the operation was successful and the patient recovered.

The pygmies also know a remedy for leprosy, but they are wily enough not to reveal their medicine to the white men. White men, therefore, have been unable to learn whether the medicine they use is a permanent cure or only a check. Whatever it is, however, it will be valuable to science when scientists can induce the pygmies to reveal it.

Occasionally now the pygmies intermarry with the normal-sized natives, and it is not unusual to see a short, little black man going through the jungle with a wife towering over him, who lifts him over the jungle undergrowth as though he were her child. —Delia Akeley, quoted in the Brooklyn Eagle.

All Happiness Ended for Betrayer of Trust

One of the most beautiful things in the world is the trust that some one places in us. Of course, there are varying kinds of trust.

If we are trusted in our business affairs, how we thrill at the opportunity of proving that the trust is entirely justified! Perhaps there steals into us, at some untoward moment, the still, small, and cunning voice of evil—and we forget. Then our world tumbles around us. We have failed; and the iron of disappointment enters into our soul.

It happens, too, sometimes, in our private life. We are loved, dearly, and with sacrifice. We feel that we shall never fall before the specious temptations that jostle us as we go a-wandering. Alas! it is the pride in us that lets down the drawbridge for the tempter to enter our castle.

We must watch our trust valiantly; aye, and ruthlessly, or else . . . !—G. H. G., in London Tit-Bits.

Deflated

His favorite aunt long had been possessed of that meaty accumulation so personally adverse to the wishes of all womankind—avoirdupois. But the youngster liked it—he chose her to be fat!

One day announcement was made that auntie had gone to the hospital for an operation, all of which was very mystifying to the youngster. In due time she returned and to his horror the rotund relative had become as slender as Anita Page.

"Aw, I don't like her that way," the youngster proclaimed in aggrieved tone.

"Why, what's the matter?" he was asked.

"Now she won't bounce so good!"

Airplane Types

The monoplane type of airplane, with a single span, produces more lift for the same wing area than the biplane or two-wing type. A monoplane may not have quite the same wing area as a biplane, yet the lift might be equal. For this reason the monoplane is considered to be more efficient. With its single wing span the monoplane gets all the lift possible from the air. The wings of the biplane, on the other hand, interfere with each other. This is also true of machines with three or more sets of wings, such as the triplane and the quadruplane.

Major and Minor Prophets

The major prophets, according to Jewish belief, received direct instructions from God, and were given political authority transcending that of kings or military rulers. The minor prophets did not have the power to command obedience as did the major prophets. The major prophets included Abraham, Moses, Samuel, Elijah, Elisha, Isaiah and Jeremiah; the minor prophets included Hosea, Joel, Amos, Obadiah, Jonas, Zephanian, Zacharias, Nahum, Habakkuk, Sophonias, Haggai and Malachi.

Claim Odd Championship

A married couple of Atlanta, Ga., claims the dual championship for broken bones. Mrs. W. L. Stallings has suffered eight major bonebreaks—shoulder, two arms, two collar bones, two legs and a hip. Stallings has fractured his skull, thumb, vertebrae, two collar bones, shoulder, crushed chest, fractured leg, wrist, six ribs, right side and six ribs, left side. He asserts the only members still unfractured are his right leg and left arm.

Douglas and Mary Todd

Albert J. Beveridge, in his life of Lincoln, says Douglas did not propose to Mary Todd. "Although it was afterward given out that Douglas had proposed to Mary and was refused because of his 'bad morals.'" writes Beveridge, "that statement was obviously protective propaganda usual in such cases; for the shrewd, alert, and, even then, worldly wise Douglas never asked Miss Todd to marry him." —Detroit News.

ARE THE OLD DAYS OF THE GOLD RUSR OVER

We notic that a good many of the mining journals of today are asking the question: "Are the days of the gold rush over?" In our opinion we do not think they are. The only trouble is that there is no place to rush to in these latter days of "piping peace" and so nobody rushes. But just let somebody—some lucky prospector—discover a new gold field in a country that is not bound down with laws and regulations that almost amount to prohibition of the miner working a mine when he has discovered it, and then see what happens. From the beginning of time the persuit of gold has been, perhaps the most fascinating occupation that has ever been known to man.

If the history of gold prospecting were fully written it would cover the entire history of adventure, discovery, and exploration. It was the pursuit of gold that brought the Spaniards to America and resulted in the settlement of this continent. The of gold drew the pioneers over the Rocky Mountains to California. The discovery of gold in Australia and in South Africa laid the foundation for the present control and prosperity of those regions.

The rewards are so great for the lucky prospector who discovers a gold mine that every new rumore of such a discovery starts a gold rush in which thousanls and thousands risk everything in the hope of getting, not exactly something for noting, but great wealth at little oost to themselves. It is in a way a gamble, of course, for every such prospector, but it is a gamble in which those who win are not taking anything away from those who lose.

But the great gold rushes of the past are matters of the dead and buried past, and there is now no liklihood of another great gold strike anywhere in the world.. That is the opinion of the appointed board or gold delegation of the Leage of Nations which has just completed a world-wide survey of the gold situation. Since the year 1915 there has been no increaese in the annual production of gold and the League's experts say that inside the next ten years the annual supply of gold will have fallen off by at least 25 per cent.

The known gold fields of the world are becoming exhausted and almost all of the entire world has been combed for new and undiscovered gold fields.

There are a few portions which have not yet been thoroughly prosliklihood of finding gold in those places as very remote. There are desert areas in Australia, Central Asia and Northesast Africa, and tropical regions at the headwaters of the Amazon and Orinoco rivers in South America with possibilities in Labrador and also in Northern Canada, but the biggest chance of finding new gold fields is in Peru, it is said. However there are fair chances of new deposits being found in Montana, Nevada and our own state of California, but there is little liklihood of this happening just at present. The best bet according to minrich gold deposits of California now ing engineers lie in the fact that the original rich gold deposits of California have virtually only been scratched over and that the real rich deposits lie far below the old early-day workings and have as yet never been sampled. There are still gold deposits to be found in this state just as rich as the finds that caused the rush to this state in 1849 and the rush to Klondike in 1897, the gold rush to the Rand in South Africa, and other historical rushes in the past. The difference is that now it takes men with financial backing and grit to open up and work these deep deposits of gold whereas in the earl ysurface digging days any man with a gold pan and pick could go out in the hills and make his stake. The days of deep mining are here, but the man or company who put their money and energy into a deep gold property today is just as sure of results as the man with the pick and shovel in the days of yore.

To Foretell Change of Weather, Watch Spider

It is not everybody who can afford to buy a barometer, but no one who possesses even the smallest of back gardens need be at the mercy of the vagaries of climate. The discovery has been made that spiders are quite good substitutes for barometers, providing one has time to study them. Here are some hints as to how to "read" spiders in relation to the weather. If your spider is lazy and sits complacently thinking of those things that occupy the spider mind, then it is a sign that it is going to rain, but if it busies itself and runs here and there in the rain, fine weather is likely to follow soon. Before putting on the filmy frock, see if the spiders have made their webs with the filaments—the supporting "strands" so to speak—shorter than usual. If they have done so, don't wear anything that will spoil in the rain, for the weather will very probably prove to be unpleasant. On the other hand, if these filaments are unusually long the sun will shine and a perfect day will result. For those romantic young people who are fond of moonlight walks, it should be pointed out that if they see a spider change the construction of its web between the hours of six and seven in the evening, they will not need an umbrella. These are the conclusions of one who has made a study of the habits of spiders for years.

This May, or May Not, End Income-Tax Worry

A Lebanon man says he worried a good deal over making out his income-tax return, until he finally hit upon a simple formula, which he now offers free of charge to any who may be perplexed in the future.

He listed as dependents one blond wife, a sedan car, three goldfish, and two children. He then multiplied his grandfather's age by six and seven-eighths, subtracting his telephone number. Next he added the size of his hat and subtracted the number of his car. After these preliminaries, the rest was easy.

Deducting $1,000 for keeping his wife a blond for the whole year, he divided the remainder by the number of lodges he belonged to, multiplied by the number of electric lights in the house, divided by the size of his collar.

This gave his gross income, which, after dividing by his chest measurement, and subtracting his blood-pressure, gave the net amount owed to the government.—Lebanon (N. H.) Paper.

Sunshine and Vitamin D

The general, hazy idea that sunshine puts vitamin D into the body is wrong, although it is on the right track. Rather, it is the sunshine that wakes vitamin D into action through the effects of the ultra-violet ray. The vitamin is there, but remains inactive until activated by the rays.

The absence of the rays prevents the body from making use of the lime and phosphorus in the food, and, in the case of children, brings about rickets, bow legs, pigeon breast, knock-knees and similar abnormalities.

In adults, while the effect is not so serious, it brings about the withdrawal of minerals in the bones, making them porous and brittle.

Witchcraft Still in Wales

In spite of recent educational campaigns belief in magic and witchcraft persists in Wales to an amazing degree, according to Prof. T. Gwynn Jones. In the Clamorgan district, he reported, "black magic" is still practiced, an instance of this being by a woman who wanted to bewitch an enemy. Belief in ghosts and fairies is still quite common in Midwales and in Cardiganshire ghosts of the dead are believed to appear either to perform a neglected duty or to do a kindness to a relative or friend. Ghosts are declared there to have given information of hidden treasure.

"Second-Hand" Things

About leftovers an author has this to say: "As we grow older we put more value on life's leftovers, on old clothes that are too good to throw away; on an old love that has settled down from hectic ardor to placid companionship; on old habits that we have inherited from a speedier moving youth. So much of life's worthwhile things are second hand, anyway; each morning a second-hand sun rises on a second-hand world and lights second-hand people going about their second-hand work." — Indianapolis News.

Perfect Enjoyment

An old merchant mate, who had retired from the sea, for his own satisfaction, hired a small boy to hammer at the cottage door every morning at dawn and howl:

"Cap'n wants you on the bridge!"

"What sort of a mornin' is it?" the ancient mariner would come back.

"Dark as a dog's throat, an' rainin' and blowin' like beggary!"

"Then tell the cap'n to go to h—l!"

And he settled down once more to a warm pillow.—Kansas City Times.

Sweet Stones

Peggy's father had been out of town and when he returned, he brought her some "rock" candy. The following week he was again obliged to leave the city, and just before he left, Peggy kissed him, and said:

"Be sure and bring me some more of those sweet stones, daddy!"

Great Buddhist Temple Deserted and in Ruins

It is the Chandi Borobudur, at Djokjkarta, the ancient temple ruin 325 miles up the hills west of Batavia. Its carved, gray, volcanic rocks tell the story of Gautama Siddhartha the Enlightened, or the Buddha, for whom the temple bells tinkle in Ceylon and Burma and the bronze gongs clash in 10,000 lamaseries in Tibet, China and Mongolia, writes Allan T. Holcomb, in the New York Herald Tribune.

Vast in size, magnificent in architectural conception and unbelievable in its wealth of fantastic bas-relief, the Borobudur now stands desolate and solitary in the midst of one of the world's most teemingly fertile plains.

A bit of the ashes of the All Wise and Enlightened One rests under the mighty stupa with only an occasional pilgrim to do reverence as he struggles up the terraces on the eightfold path of perfection. Priests of the yellow robe and the shaven head no longer flit through the stupendous galleries.

Dutch guards keep vigilant watch on all visitors, especially enterprising American tourists, who have been more than suspected of knocking off and pocketing small heads of the Buddha and his more interesting disciples.

Tendency to Drop Use of Solemn Word "Death"

The word "translation," in its sense of the removal of a person to heaven, concerns such removal of a mortal body in life, as the "translation" of Enoch. "Transition" is passage from one place, or condition, or action to another; as in biology, the change of a tadpole to a frog; or in geology, of one formation into another; or a change from heat to cold. Neither the word "transition" nor the word "translation" ought to be used in a letter of condolence. The correct word to use is unquestionably "passing," which is defined as "a going away; departing; hence, dying"; from the verb to pass, "to go beyond recognition by the senses; to depart from life," in which case the verb is followed by away, as in the sentence," "All earthly things must pass away," or "She passed away last night."

But what word is there that is more solemn than the word "death" itself, and why should not one make use of it? Among other words are, decease, demise, departure, and desolation.—Literary Digest.

Bridges Over River Jordan

Although, generally, it has a swift current with many rapids, the River Jordan is shallow in parts and fordable, while at its lowest reaches its valley widens out into the once luxuriant plain of Jordan, where stood the famous city of Jericho, and south of it the destroyed cities of Sodom and Gomorrah.

Just below the sea of Galilee the Romans built a stone bridge, the ruins of which are still in existence. Further south is a substantial bridge called the Jisr-Mejamia, probably also of Roman foundation repaired by the Saracens some centuries later. Where the Jabbok flows into the Jordan are traces of another bridge, long since allowed by Turkish indifference to fall in ruins. This or another bridge lower down was destroyed by the Turks in the World war and replaced by the substantial stone and iron Allenby bridge.

Modern Timekeeping

One of the greatest clocks that have ever been made was that of Glastonbury (Eng.) abbey, which ran for five hundred years! Today electric devices are used for keeping clocks properly wound up, and also to record accurate timing. At Greenwich observatory a ball drops at one o'clock exactly by means of electric mechanism, and Greenwich is responsible for the control of Big Ben. Wireless time signals have made accurate timekeeping a simpler task throughout the world, and are especially useful to those at sea.

Spirit!

At the battle of Germantown on October 4, 1777, a round shot from the British artillery passed through the horse ridden by General Nash of North Carolina, shattering the general's thigh. The fall of the animal threw its rider to the ground with considerable force.

With great courage, General Nash, covering his wound with both hands, gayly called to his men: "Never mind me; I've had a devil of a tumble. Rush on, my boys—rush on the enemy. I'll be after you presently." A few days later he died.

Defined

The conversation at the village inn was about the newcomer, who had rented a cottage for the summer.

"What be his business?" asked one of the company.

"An oculist," was the reply.

"And what may that be?" persisted the inquiring one.

"Oh, well, an eye dentist."—London Answers.

Co-Operation in Work

The laborer is worthy of his hire, we are told. But this is only half the story. The wage is also worthy of the worker. Equal emphasis to both sides of this proverb results in that co-operation of capital and labor which doubly insures prosperity for all.—Grit.

CAMPTONVILLE JOTS

(The following Camptonville items were received too late for publication last week.)

Alfred Heether motored to Nevada City Thursday on a short business visit.

E. Z. Bown and Chas Donnelly made a business trip to Nevada City Thursday.

C. A. Larson and wife of Sacramento, were in town Thursday on a short business visit.

Miss Hillman and a party of her friends of Nevada City were here Thursday evening on a short visit.

William H. Cartwright and Jack Dyer of Grass Valley passed through town enroute to the upper country with a load of produce.

E. C. Klinker of Forest City who spent two days here having his car repaired at the Lang Garage, left Thursday.

Earl Rickard of Goodyear Bar started to drive the Fischer stage Thursday morning.

Mr. and Mrs. Earl L. Cleveland arrived Friday from Sacramento and will spend two weeks here.

Earl Kriegal of Auburn passed through town Wednehday from Downeyvill enroute to his home.

F. J. Joubert and J. L. Joubert motored to Downeyville Thursday, on a brief visit.

A. E. Hodgkinson of Alleghaney passed through town Friday enroute to Los Angeles.

Forest Ranger Robert Hughes, who has charge of the forest service road camp, located at Brady City, left Friday for the winter, to work in the southern part of the state.

Si Perkins and James Foote, of the Pacific Telephone and Telegraph company of Grass Valley were in town Friday doing some repair work on the lines.

Ray Davis of Nevada City was in town on business Friday.

Lee Bullington, local carpenter, and his son Louie E. Bullington and Lee Bullington, local corpenter, and his son Louie, in company with G. T. Langley, spent four days this week repairing the covered bridges on Oregon Creek at Freeman's Ceossing.

Hehman Ramm left last week for his home at the Bay after a week's visit at his old home here.

Miss Katherine Pauly, Ray Henderson and friend, of San Juan, spent the week-end visiting resatives here.

Mr. and Mrs. Julius A. Cassano motored to Nevada City Saturday.

STAGE TIMETABLE

Graniteville Stage leaves Nevada City at 7 a. m., for Lake City, North Bloomfield, Moores Flat, and Graniteville. Leaves Graniteville at 7 a. m., for Nevada City.

Alleghany Stage leaves Nevada City daily, except Sunday at 1:00 p. m., for Tyler, Columbia Hill, Alleghany and Forest. Leaves Forest at 6:30 a. m., for Nevada City.

Marysville Auto Stage leaves at 8.00 a. m., for Rough and Ready, Smartsville, Hammonton and Marysville. Leaves Marysville at 1:00 p. m. Connects at Smartsville for North San Juan.

Downieville Auto Stage leaves Nevada City daily at 1 p. m., ar- Leaves Downieville daily at 6 a. m., arriving in Nevada City in time to connect with 10:30 train for San Francisco.

Washington Stage leaves Nevada City at 6:30 a. m., for Washington Leaves Washington at 6:30 a. m. for Nevada City.

STEAM-HEATED METAL

on our garment presses prevents scorching, when you send us your laundry . . .

Steam-heated metal will not scorch—so that is what we use on the presses where garments are ironed. This is just another of the countless ways in which we safeguard your clothes—send them back to you in tip-top shape. Let us prove that we can do your washing better, quicker, more economically. May we call for *this week's* bundle?

Laundry leaves Tuesday afternoon, Return Friday afternoon.

AGENT FOR

COLFAX STEAM LAUNDRY

BRET HARTE CIGAR STORE

Mrs. Frank McKeon of San Francisco is spending a few days in this city.

Supervisor and Mrs. W. E. Miller of Sierraville, were in the city over the week-end.

Mrs. F. T. Nilon, who has been in the Bay region for the past ten days or so has returned to her home in

Mr. and Mrs. James Godfrey of North Columbia, spent Tuesday shopping in the city.

T. Campbell, mining man of Sierra City, was a business visitor in this city over the week-end.

Al Summers and J. M. King of Camptonville spent the week-end with friends in this city.

Rev. Father O'Reilly drove to North Columbia last Sunday night and was the guest of the Coughlin family.

Frank Davis spent a few days with friends in North Columbia last week.

Mrs. S. Schofield of San Francisco, who is a former resident of this city was the house guest of Mrs. G. E. Redmayne last week.

Earnest Angove and family and Mrs. Andrew Berryman visited with friends at North Columbia on Sunday of last week.

Alton Davies who has been spending the week-end with friends at North Columbia, has returned home.

Mr. and Mrs. Alfred Medin have returned to their home in Sacramento after spending the holiday with Mr. Medin's mother, Mrs. F. W. Medlin.

Mrs. Niles P. Searls, executive secretary of Oakland Camp Fire Girls, accompanied by her assistant, Miss Evelyn J. Kendall, spent the week-end in this city.

Bill Rector, and Milton Masters, both of whom are students at the University of California, have returned to their studies after spending the Thanksgiving holiday with relatives in this city.

Supervisors E. B. Dudley of North Bloomfield, Joe Frank of Rough and Ready and Alex Robertson of Hobart Mills are here to attend the regular session of the board of supervisors.

Miss Nadine Sutton has returned to Berkeley where she is a student at the University of California. She had been spending her Thansgiving vacation with her father, Earl Sutton and Dr. and Mrs. J. R. Ivey.

George Scheffer who spent several months in Sacramento, returned to his home in this city on last Sunday evening. He was accompanied here by his daughter Mrs. Chester Jenkins and husband, and Clayton Scheffer, who spent the day here but returned to Sacramento.

Mr. and Mrs. Ross F. Taylor of Downeyville spent Thanksgiving with relatives in the Bay section, passed through this city enroute to their home Wednesday..

Mr. and Mrs. W. E. Miller of Sierraville, were guests at the National for a few days last week.

A. Summers and J. M. King of Camptonville were registered at the National Wednesday.

S. Barbaria, V. Barbari, Mrs. M. E. McKeon all of San Francisco were guests at the National Wednesday.

Alex Robertson of Hobart Mills, was transacting business in the city Wednesday.

A. M. Munson, Mrs. D. H. Davis all of Oakland, were registered at the National last week.

Mrs. Fred C. Worth has returned from Sacramento where she spent the last few days.

George C. King of Goodyears Bar and J. A. McIntosh of Cisco, Tahoe National Forest Rangers, are here to attend a Rangers meeting today in Forest Service headquarters in this city.

Mrs. Ella M. Austin, county superintendent of schools, drove to Spenceville Wednesday afternoon where she made an official school visit.

E. S. White, former resident of htis city,but now traveling Passenger agent for the Southern Pacific Railroad company, was here on business Wednesday.

Mr. and Mrs. Fred M. Cassidy left Wednesday for Los Angeles where where they expect to see the football game betwen U. S. C. and Notre Dame on Saturday.

FRENCH CORRAL

FRENCH CORRAL, Dec 4.—(Special to the Nugget).—Well, here we are in the last month of the year of the year, and if were not Californians and Nevada Countyans we could hardly believe it winter with such delightful days of warmth and sunshine. With Thanksgiving past we now look forward to Christmas and already everything is taking on holiday garb and happy little hearts are preparing letters for Santa Claus. In our quiet litle secttion visitors are already collecting mistletoe and toys. Yes, there are happy hearts and said hearts. Well, and tell the "news" as ever, people we must awaken from this movie come and go. Our noble old war veteran, Ernest Prati, has gone to Grass Valley for a short visit.

Mrs. A. Browning and son, Clyde, made a trip to Nevada City Thursday.

Miss Laura Moulton came from Washington Wednesday to spend Thanksgiving with her parents.

Mr. Thornton, Mr. Thomas Winters, Mrs. Vician and children went to Sacramento to spend Thanksgiving holiday with friends.

A. Browning and family returned to French Corral Sunday. We are glad to state that Mr. Browning is recovering from the accident in which he injured his leg while at work in the Murchie mine.

A. T. O'Connor of San Rafel spent Thanksgiving vacation at the family home in Birchville.

Miss Francis Moulton returned to Sacramento Friday. She was accompanied by her parents and Mrs. E. Southerland and daughter Barbara.

Merl Fischer, Virgil Alvezedo and Jack Moore of Sacramento were week-end visitors at the home of Mr. and Mrs. J. W. Culver.

Richard Henderbrook of Oakland, has returned to French Corral to spend the winter.

Thomas Meyers has gone to San Benito to spend some time with his relatives.

Mrs. Mary Mitchell and her sister, Mrs. Francis Hardenbrook of Grass Valley, were Sunday visitors.

J. R. Harlette and sons Elmer and Floyd, made a trip to Hood to visit his daughter Mrs. Glenn Orr.

Mrs. K. Sullivan and Miss Nellie Sullivan returned to French Corral Monday after spending the week in Nevada City. They were accompanied by Mr. and Mrs. P. H. Flynn of Nevada City.

Stanley Brice was a visitor from San Juan Monday.

We note with sorrow the death of Albert R. Moynier, who passed away at the Nevada City Sanitarium Nov. 26th. Albert, or "Tim" as he was familliary called by his schoolmates, was beloved by all and will be sadly missed, especially by his friend Mrs. Sullivan whose faithful comforter and friend he had been for the past seven years. His funeral was well attended by many friends from this place.

HOLIDAY TRAVEL AIDED BY RAILROADS

From all points west of Ogden and Salt Lake City, between Portland in the north and Albuquerque and Ell Paso in the south, family gatherings for Christmas and New Year will be aided this year by special round trip excursions on the principal railroads lines.

Joint announcement of the holiday fares, to be offered December 18 to January 1 with a return limit of January 6, was made today by the Southern Pacific, Santa Fe, Western Pacific and Sacramento Northern railroads.

LONE MAN STANDS GUARD OVER BULLION

SAN FRANCISCO, Dec. 5.—There must be something about Officer B. C. Lally, of the harbor police of San Francisco that keeps gangsters away from his immediate vicinity.

The liner Shinyo Maru brought $2,250,000 in gold bullion here consigned to the United States Mint and due to tie-up could not unload until the following day. The bullion was stacked up on the wharf and Officer Lally was detailed to stand guard and see that it was not carted off during the night. The bullion had a total weight of five tons and were moulded in huge bricks that had the appearance of pig iron ore and no one disturbed the officer and his precious charge during the night.

"It's not much fun watching a couple of million dollars worth of gold all night long in these days of gang rule," said Officer Lally.

CONGRESSMAN TAKES LEASE ON PROPERTY

RENO, Nev. Dec. 5.—Congressman S. S. Arentz, last week secured a bond and lease on the Escalon property in the Mountain City district in northern Humboldt county. The group is adjacent to the noted Mount Laurel property and is said to show a six-foot ledge of gold-silver ore. A new crosscut tunnel has been driven 200 feet and is expected to tap the ore body within 100 feet at a depth exceeding 300 feet.

The American Development Company, controlled by California capitalists is shipping eight carloads of barium each month from its mine near Eagleville to the new refining plant at Berkeley.

This corporation is also developing barium deposits near Carlin, prospecting tungsten claims near Rawhide, and contracted to handle the barium produced by the American Alunite Company at Sulphur on the rim of the Blackfoot Desert. The product is converted into fertalizer.

Drilling operations of the Southwest Mines Investment Company on the old Wedeking gold-silver mine, near Sparks, is proving decidedly encouraging, according to J. E. Miller, general manager. So satisfactory has the prospecting proven that the 150-foot Dennison shaft is to be depened 170 feet and extensive lateral work prosecuted.

The third drill hole is said to exposed three ore-bearing stratas and prospecting is being continued for the Arkell ledge. The Wedeking was a noted gold producer about 30 years ago and is claimd to still contain profitable ore bodies.

MINING LOOKS GOOD IN MARIPOSA COUNTY

From many sections of Mariposa county, we hear daily reports that gold mining is picking up and that yellow metal going from this county to the mint in San Francisco to be made into coin, says the Mariposa Gaette.

There are now more actually producing mines in the county than there has been before in many years. Although work is being carried on, as a rule, with small forces, yet the production of gold is the real factor and that is being done and will be done to a greater extent when other mines under present development have reached the production stage.

State-wide interest is being centered on gold production. The U. S. government is demanding a heavier gold production and the entire world is feeling the effects of the scarcity of gold.

Mariposa county is, without doubt the greatest undeveloped gold area in California and a section to which mining men are going to center a great deal of activity during the next few months. Mining men who have worked in some of the biggest gold fields of the world are astonished when told that the deepest mine in Mariposa county is not over 1600 feet deep and there are not probably over six or eight mines in the county that have been sunk over one thousand feet.

MRS. ANNIE BRIGHAM DIES AT PORTLAND

Friends at North Columbia have received word of the death of Mrs. Annie Brigham, wife of Arthur Brigham, which occurred at Portland, Oregon on November 27th. She had been ill for some time and her death was not unexpected.

Mrs. Brigham was aged about 52 years and besides her husband is survived by two married daughters.

She made her home in North Columbia and in this city for a number of years and will be remembered by a great many of her former neighbors and friends as she was greatly esteemed and loved for her sociable and kindly disposition.

HOME MISSIONARY SOCIETY HAS TEA OFFERING

The ladies of the Home Missionary Society of the Methodist church gave a "Thank Offering Tea" at the parlors of the church on last Wednesday from 2 to 5 p. m. A fine program was rendered, featuring several vocal and instrumental numbers given by out-of-town visitors which was thoroughly enjoyed.

BOULEDER DAM WORK SUPERINTENDENT NAMED

Leonard L. Blood has been appointed superintendent of the government employment office at Los Vegas, Nevada to supervise the employment of the Boulder Canyon Dam project, which is expected to start construction on the dam proper by April 15.

Contracts for the construction of more railroads and highways for the transportation of materials are to be let March 1st.

OREGON MINE TO ADD NEW EQUIPMENT

MEDFORD, Ore.—Initial improvements are under way at the Lower Mine near Jacksonville and plans for working the property at an early date are being made.

The Pacific States Mining and Development Company (the new owners) have shipped in several cars of machinery which are being installed. Tracks and tunnels are among the projected improvements being made by the company.

$90,646.96 TAXES PAID UP TO DATE

Tuesday was a busy day in the county treasurer's office where the tax payers went to pay their taxes to the county treasurer. Those who visited the office Tuesday and those who mailed their remittances enriched the county to the extent of $21,159. During the month of November a total of $90,646.96 was paid.

This is the last day for paying your tax without having a penalty tacked on and the office closes at five p. m. December fifth. After that you will have to pay the penalty made and proscribed in such cases.

BIRD SEASON OPENED TUESDAY—BIRDS SCARCE

Last Tuesday was "bird day" and the sportsmen were out early. Birds were reported scarce and no one that we heard of reported a limit bag.

HEALTH GIVING SUNSHINE FROM THE LAND OF THE MIDNIGHT SUN!

Doctors recommend Puretest Cod Liver Oil for building and toning up the system, for protection from colds, grippe, and for the strength contributed by its Vitamins.
